

List of EPA Certified Wood Stoves May 17, 2011

EPA Wood Heater Program

Enclosed is the list of wood stoves certified by the United States Environmental Protection Agency (EPA). An EPA certified wood stove or wood heating appliance has been independently tested by an EPA accredited laboratory to meet a particulate matter emissions limit of 7.5* grams per hour for noncatalytic wood stoves and 4.1* grams per hour for catalytic wood stoves. All wood heating appliances subject to the New Source Performance Standard for New Residential Wood Heaters under the Clean Air Act offered for sale in the United States are required to meet these emission limits. An EPA certified wood stove can be identified by a temporary paper label attached to the front of the wood stove and a permanent metal label affixed to the back or side of the wood stove (See examples below). Please contact John DuPree at 202-564-5950 should you have questions regarding a particular model line or manufacturer.

Temporary Wood Stove Label

Permanent Wood Stove Label

* Wood stoves offered for sale in the state of Washington must meet a particulate emissions limit of 4.5 grams per hour for non catalytic wood stoves and 2.5 grams per hour for catalytic wood stoves.

Section 1. List of EPA Certified Wood Stoves (May, 18 2011)

| <i>Manufacturer Name</i> | <i>Model Name</i> | <i>Emission Rate G/HR</i> | <i>Heat Output BTU/HR</i> | <i>Efficiency Rate</i> | <i>Type</i> |
